An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- The title has been changed. See Bib sheet.

This application is in condition for allowance except for the presence of claims 16-21 directed to a non-elected group without traverse. Accordingly, claims 16-21 have been cancelled.

The following is an examiner's statement of reasons for allowance:

The closest prior art is "Directed Growth of Free-Standing Single-Walled Carbon Nanotubes." This reference teaches controlled chemical vapor deposition for producing single-walled carbon nanotubes. The process uses three components to develop a liquid-phase catalyst precursor material: inorganic chloride precursors, a removable triblock copolymer and an alcohol. However, the reference does not teach, nor suggest forming a film containing a metal organic compound and a water-soluble polymer compound as required by the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
